EGLAS
HEAT | COMFORT | FUNCTIONALITY
THE TRANSPARENCY OF GLASS WITH THE BENEFIT OF HEATING
EGLAS
Comfortable warmth with no condensation

THERMAL COMFORT INSIDE
EGLAS has been designed to provide heat from the glass, improving the thermal comfort inside the building. Depending on the type of application and the glass structure, EGLAS can fulfil the following functions:
• Anti-condensation
• Additional room heating
• Main heating
• Snow melting.

EGLAS was developed in 1986 in Finland.
The working principle of ‘warm glass’ is based on the application of two factors: electric current, and a layer of metal oxides, applied on one surface of the glass.

EGLAS PROUDLY MANUFACTURED BY SAINT-GOBAIN IN POLAND
EXAMPLES

EGLAS provides heat from transparent glass in all regions of the world.

FINLAND

Concert hall, Hämeenlinna, Finland.

Kakslauttanen Arctic Resort, Saariselka, Finland.

RUSSIA

Mercure City Tower, Moscow, Russia.

Gostiny Dvor, Moscow, Russia.

INTERNAL APPLICATIONS:
Internal partition walls, doors, glazing, glass floors, fridge doors.

EXTERNAL APPLICATIONS:
Facades, windows, bi-fold doors, porches, conservatories, glass roofs.
MAKE USE OF THE OPPORTUNITIES OFFERED BY EGLAS

If you are ...

... a building user

Your window panes will guarantee comfortable temperatures in your rooms.

No steam, no snow will block your view of the world. The number of days with beautiful, natural light will increase noticeably.

Use EGLAS as a heated glass floor. Make an EGLAS partition wall, which will warm up your room. Do not limit your applications.

... a building owner

Thanks to EGLAS, problems connected with snow-clearing and steam condensation will fade into oblivion.

You can make sure that the energy consumption is low. You can also achieve energy optimisation and eliminate draughts inside your building.
If you are ...

... an architect, a designer

Your design will be more functional. You can integrate invisible heating system in the spaces you create. You can optimise your space according to your wishes.

Using EGLAS in glazing units, you can combine its functionality with other products and solutions from the vast array of Saint-Gobain products:
• STADIP
• PLANITHERM / COOL-LITE
• PRIVA-LITE
• BIOCLEAN

... an installer, a fabricator

Your installation of EGLAS will be quick and without any problems. EGLAS is compatible with most types of profiles – PVC, aluminium, wood.

EGLAS is supplied together with all accessories necessary for its installation, in dimensions and functionalities consistent with your order.

Installation of EGLAS II Generation is incredibly easy. All you need to do is to plug it in a 230V socket and ...

... feel the warmth

**EGLAS - Installation**

*MAX.: 3800 mm MIN.: 500mm*

**Compliance with legal regulations**

EGLAS is consistent with the following standards:

- **CE marking:**
  - EN 1279 – Double glass units
  - EN 1096 – Coated glass
  - EN 12150 – Thermally toughened safety glass
  - EN 14449 – Laminated glass and laminated safety glass.
Double/triple glazed unit with tempered and laminated glass

Tempered and laminated glass

EGLAS has been developed so as to secure quick assembly without any problems in compliance with the regulations in force
